

Mohsin Khawaja

Berkeley, CA | 510-949-7141 | mkhawaja@ucsd.edu | [linkedin.com/in/mohsin-khawaja](https://www.linkedin.com/in/mohsin-khawaja) | mohsinkhawaja.com

Education

University of California, San Diego

Aug 2021 – June 2025

B.S. Cognitive Science: Machine Learning & Neural Computation, Minor in Computer Science

Coursework: Machine Learning, LLMs, AI Algorithms, Reinforcement Learning, Computer Vision, Data Structures & Algorithms, Computer Organization, Brain Computer Interfaces, Computational & Quantitative Finance

Leadership: Founder & VP (Muslim Tech Collaborative), Board Member (SDx), Captain (Men's Club Soccer)

Experience

Aviz Networks

Oct 2025 – Present

AI Engineer (Customer Success)

San Jose, CA

- Built autonomous NetOps agent resolving **100+ Zendesk tickets** using MCP-based tool orchestration, telemetry parsing, CLI tool-calling, reasoning workflows, and network engineering logic.
- Developed **10+ LLM agents** for triage, RCA, config validation, and remediation across enterprise SONiC deployments.
- Integrated agents with streaming telemetry, device logs, vector retrieval, and **Network Co-Pilot Sync (NCP)** APIs.
- Implemented RAG pipelines, structured outputs, guardrails, and prompt routing to automate L3-level network troubleshooting. Re-racked data center devices for optimization.
- Enabled customer workflows and live pre-sales demos by deploying production agents with CS and sales teams.

Amazon

June 2025 – Aug 2025

Data Analytics (Contract)

Remote

- Built analytics pipeline processing **12K+** employee feedback entries across global regions.
- Used NLP sentiment classification and SQL (**91% accuracy**) to generate HR policy insights.
- Developed persona clusters to identify engagement trends across distributed orgs.
- Presented findings to senior HR leadership shaping Q3 support strategy.

UC Berkeley College of Engineering

June 2024 – June 2025

Machine Learning Engineer

Berkeley, CA

- Developed real-time BCI control for robotic exoskeletons with **87% accuracy** and **120ms** latency.
- Optimized ML pipeline (PCA + CV), improving to **91% F1** and reducing model size **40%**.
- Built EEG preprocessing tools for applied AI research integrating band-pass filtering, ICA, wavelet denoising, and spectral feature extraction.
- Conducted experiment protocol for recording motor intention signals and cognitive activation states.

Matroid

June 2023 – Aug 2023

Software Engineer Intern

Palo Alto, CA

- Developed backend services for computer vision deployment in industrial automation and monitoring.
- Implemented APIs and data pipelines for model inference and scalable image processing.
- Shipped production features improving reliability of vision-based detection pipelines.

Projects

EvoScope – AI Trading System | *PyTorch, RL*

- Developed LSTM + DQN system achieving **94.2% accuracy** and **2.52 Sharpe ratio**.
- Implemented real-time trade execution engine across Binance, Coinbase, and EVM-compatible DEXs.
- Designed dynamic position sizing and risk control mechanisms parameterized by volatility regimes.

LLM Political Evaluation | *NLP, Bias Detection*

- Designed evaluation framework for political bias across **5+** LLMs using **100+** controlled prompts.
- Measured response drift, ideological consistency, and token-level sentiment gradient shifts.
- Produced comparative scoring methodology to inform transparent model alignment research.

NeuroFocus – EEG Attention Classification | *TensorFlow*

- Classified cognitive attention states from EEG with **90% accuracy** for real-time neurofeedback.
- Implemented alpha, beta, and gamma-band feature extraction with multi-model evaluation (SVM, CNN, LSTM).

Technical Skills

Languages/Tools: Python, JavaScript, TypeScript, SQL, C++, Rust, Go, MCP, RAG, LangChain, Prompt Engineering, PyTorch, TensorFlow, React, Docker, Git, AWS, APIs, NLP, LLMs, Computer Vision, SONiC, Sales
